CHEST 2V	12/05/05	RA-05-28993

PA & LATERAL CHEST

CLINICAL INFORMATION: Preoperative assessment. Left cheek melanoma followup. ICD-9 code 172.3.

(There is no record of prior chest x-rays at TCH.)

FINDINGS: The osseous structures and cardiomediastinal silhouette are normal. The lungs are well expanded, and there are no focal infiltrates or signs of pulmonary vascular congestion. The diaphragm and pleural surfaces are smoothly contoured, and the costophrenic angles are clear.

IMPRESSION:
Normal chest examination.

***Preliminary report faxed to Dr. Gabel 12/06/05 16:18.
