ENDOCRINOLOGY

AMMONIATED LATEX EXTRACT (AL)	<5	f	<5	U/mL
BUFFERED LATEX (NAL)	9	HI	<5	U/mL
GLOVE LATEX EXTRACT (GL)	<5	f	<5	U/mL

AMMONIATED LATEX EXTRACT (AL)
This test was developed and its performance characteristics determined by IBT Reference Lab. It has not been cleared or approved by the FDA.

BUFFERED LATEX (NAL)
This test was developed and its performance characteristics determined by IBT Reference Lab. It has not been cleared or approved by the FDA.

GLOVE LATEX EXTRACT (GL)
This test was developed and its performance characteristics determined by IBT Reference Lab. It has not been cleared or approved by the FDA. If IgE antibody is detected for any of these antigens, then the patient is at risk if exposed to any natural rubber product in a surgical, dental, or diagnostic procedure. Patients with a positive history of a prior anaphylactic reaction should avoid latex products, even if they are negative for latex IgE.

The orders and results page displayed in Internet Inquiry is not considered the complete patient report as it does not include the interpretive data and comments in a single view. When viewing results, you can click links to view related interpretive data and comments separately. ARUP will continue to provide complete patient reports through current communication methods.
